

[Trinity Design Group](#) is a church architecture firm with a unique process to align facilities to your ministry and God-given vision.

We understand that you are about building God's Kingdom, not buildings. Your new facility is an extension of your ministry; it should not define it. Our process is a ministry-focused, team approach that allows you to continue doing what you do best- your ministry. We come alongside you throughout the entire process to plan, design and build the tools you need to serve your community and the world through your unique calling.

Our facilities expertise, coupled with 'real-world' ministry experience, gives us an uncommon perspective to crystallize your vision into a tangible tool for doing God's work on earth.
